

SHEAREX

CARBIDE TEETH

HM & VM SERIES

Shearex carbide blades are available for all of your land clearing operations in soil with stones. Choose these teeth for land clearing operations, where asphalt parts can be found, or in fields where the ground could be more rocky. These hammers provide ground breaking durability to your equipment.

The Convex DX™ Protection System concentrate the smaller material toward the center of the blades, which optimises the power of your machine. Work smarter and not harder with the Shearex mulcher carbide teeth.

Made in Canada

Reduce maintenance work

Excels in rocky soils

**Blade angle optimised
for a perfect cut**

**Convex DX to maximise
power of your machine**

COMPATIBILITY

Compatible with all types of excavators.

USAGE

Ideal for land clearing, roadside maintenance, infrastructure and land management.

G 2.0 BALANCE QUALITY

Our mulchers respect the highest balancing standard in the industry. Enhance your performance by using the Shearex mulchers, ensuring smoother operation, reducing vibration and minimizing stress on the carrier.

PROTECTION SYSTEM CONVEX DX™

The protection system is made out of four types of fins that limit the amount of material cut with each pass and concentrates smaller material toward the center of the blades.

BLADE ANGLE OPTIMISED FOR A PERFECT CUT

Our blade mount design provides greater durability and cutting power. The rotor maintains its power throughout the tooth life.
